TIME CONTROL TECHNOLOGIES

ELEVATE PRODUCTIVITY SAVE MONEY

Our Solution

TIMESHEET PROCESSING

Forget about signing countless sheets of papers. Wireless sensors will send real time data of the workers, which will seamlessly calculate the spent man hours of each worker every day.

PAYROLL PROCESSING

Avoid long nights of work loads calculating overtime, ordinary hours or vacation period days before the paycheck day. Allow us to calculate this for you automatically with a single click.

PRODUCTIVITY MONITORING

It is too much work for project managers to monitor if an activity has actually spent more manhours than planned. Monitoring is crucial in order to have the investors and stakeholders informed if the project is generating value or losses.

CLAIMS & DISPUTES SUPPORT

Our platform will have an historical reliable record of the productivity performed during the duration of the project, generating valuable data to be used for litigation or arbitration stages.

CUSTOMIZED MANAGEMENT REPORTS

By eliminating the human factor in the equation, we avoid managers taking bad decisions based on reports with mistakes from the supervisors.
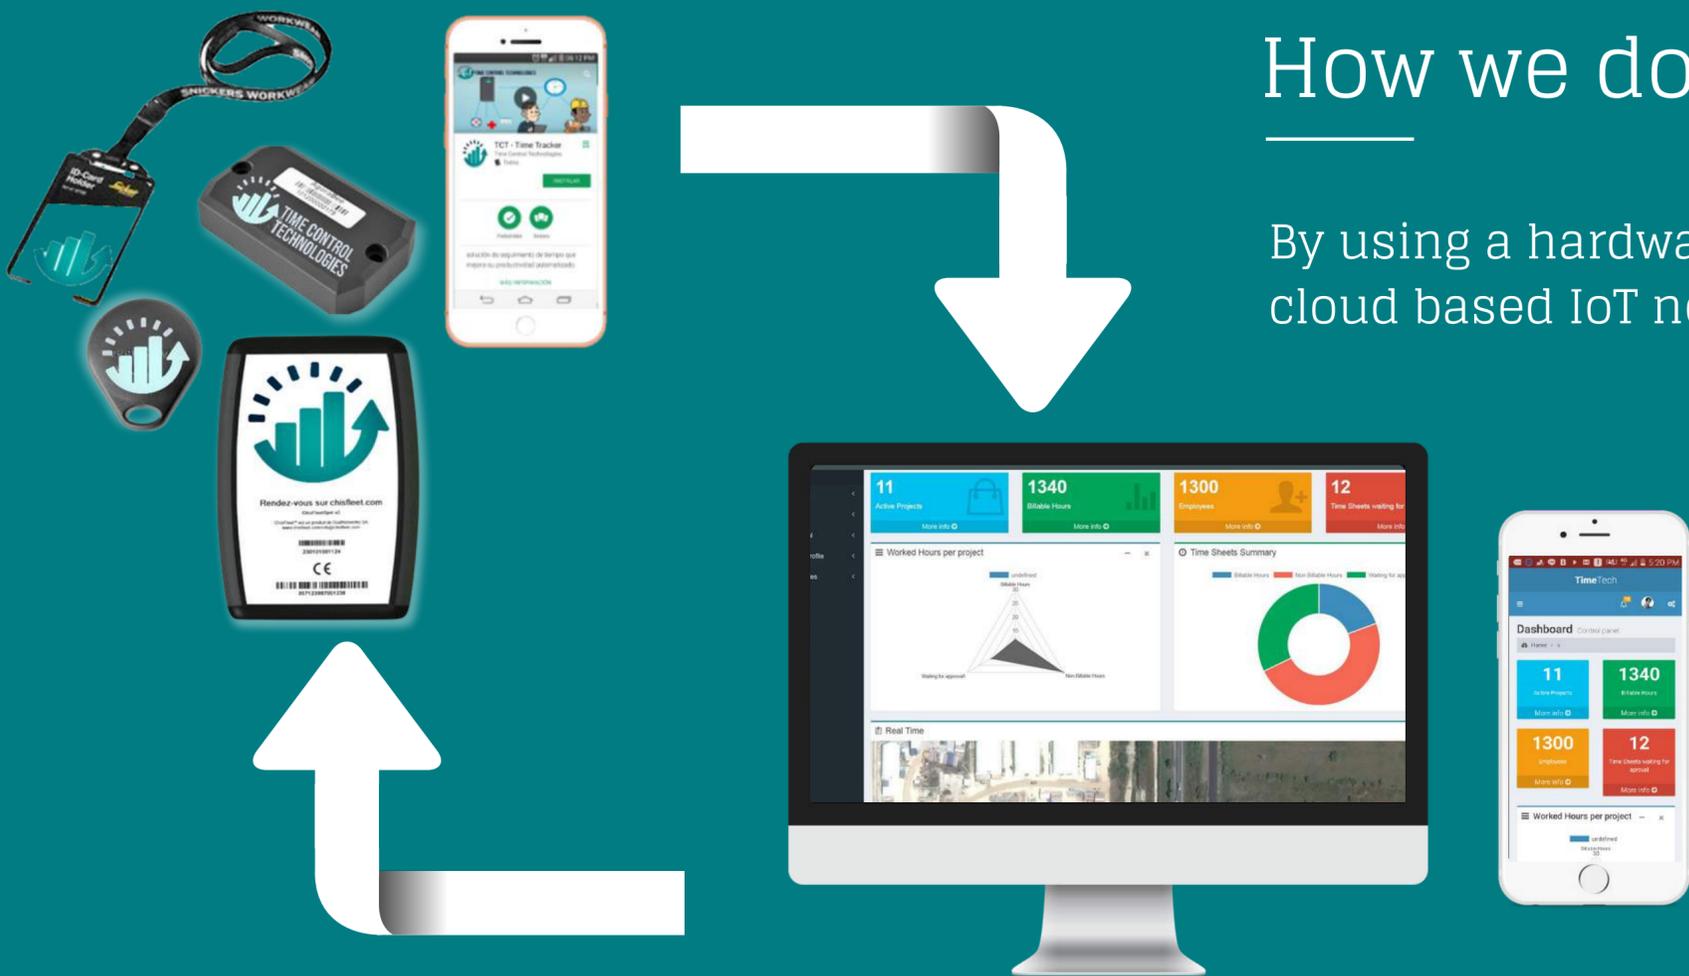

Our Values

Simple, effective, affordable.

TCT is ideal for Project Managers and Contractors who require to monitor time and resources efficiently.

TCT empowers Project Managers to focus on their work, redefining a new era in HR Operational Management.

TCT provides a fully automated,low cost and minimal intrusion to the workplace
